Team ID	LTVIP2026TMIDS47469
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
Maximum Marks	2 Marks

Problem – Solution :

Problem Recap •

Users (buyers, sellers, analysts) lack easy-to-understand, interactive, and feature wise insights into real estate prices. • Market data is often raw, scattered, or non-visual, which makes decision-making difficult.

Solution Fit •

Build a Tableau-based interactive dashboard that: • Visualizes trends in housing prices. • Links features (like sqft, bedrooms) with prices. • Enables filtering by region, time, and features. • Uses maps, charts, and tooltips to simplify insights. • Ensures users don't need technical knowledge to explore meaningful insights from raw data.
