DA Assignment – 2

Supermarket Sales Analysis using Tableau

Name : Modugula Gangothri

Roll No : 22BFA04281

Branch : Electronics and Communication Engineering

College : Sri Venkateswara College of Engineering (SVCE), Tirupati.

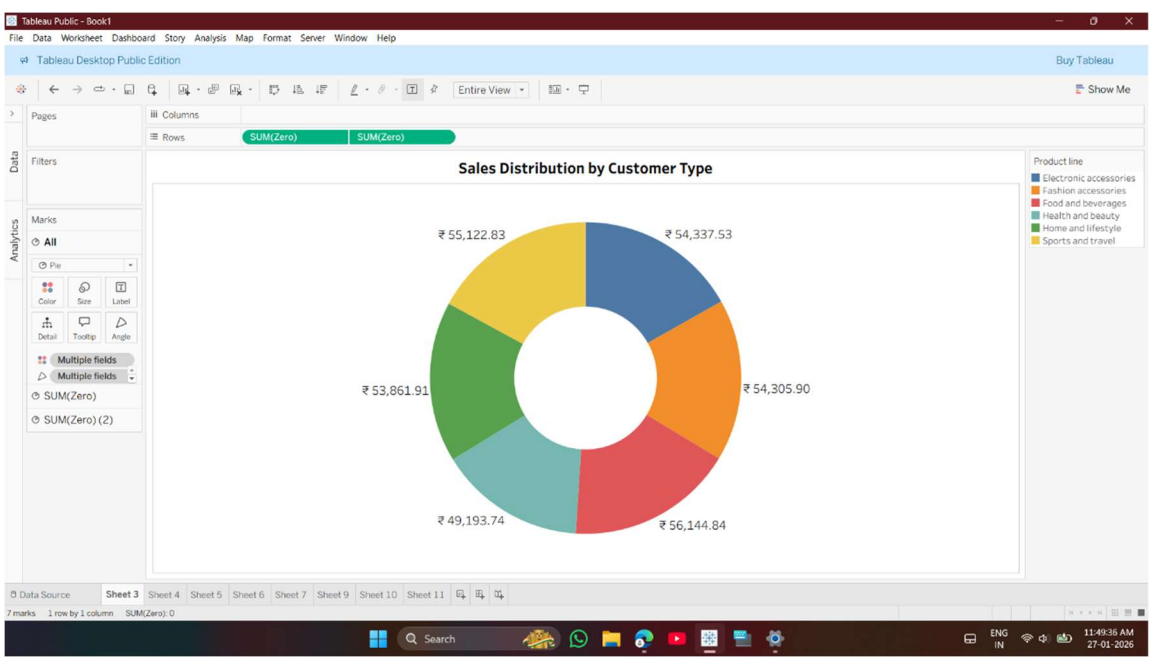
Email : gangothrimodugula@gmail.com

Dataset: Supermarket Sales Dataset

Description:

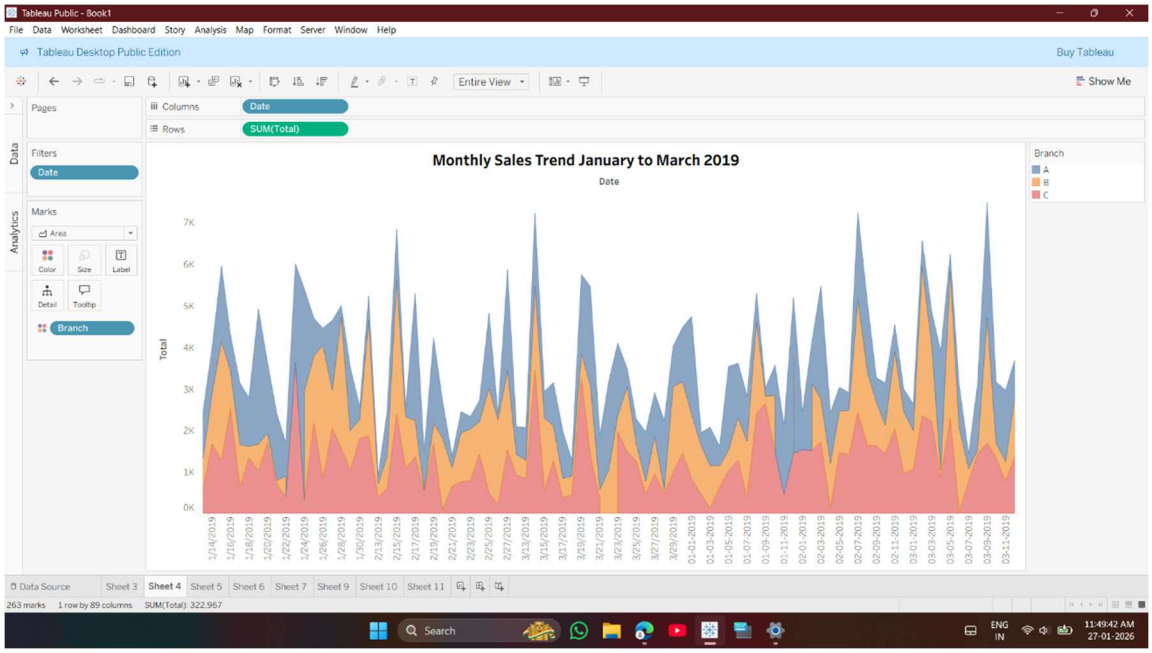
In this assignment, Tableau is used to examine supermarket sales performance across branches and product lines. Various charts are developed to study sales trends, income contribution, and product popularity.

1. Donut Chart – Sales Distribution by Product Line



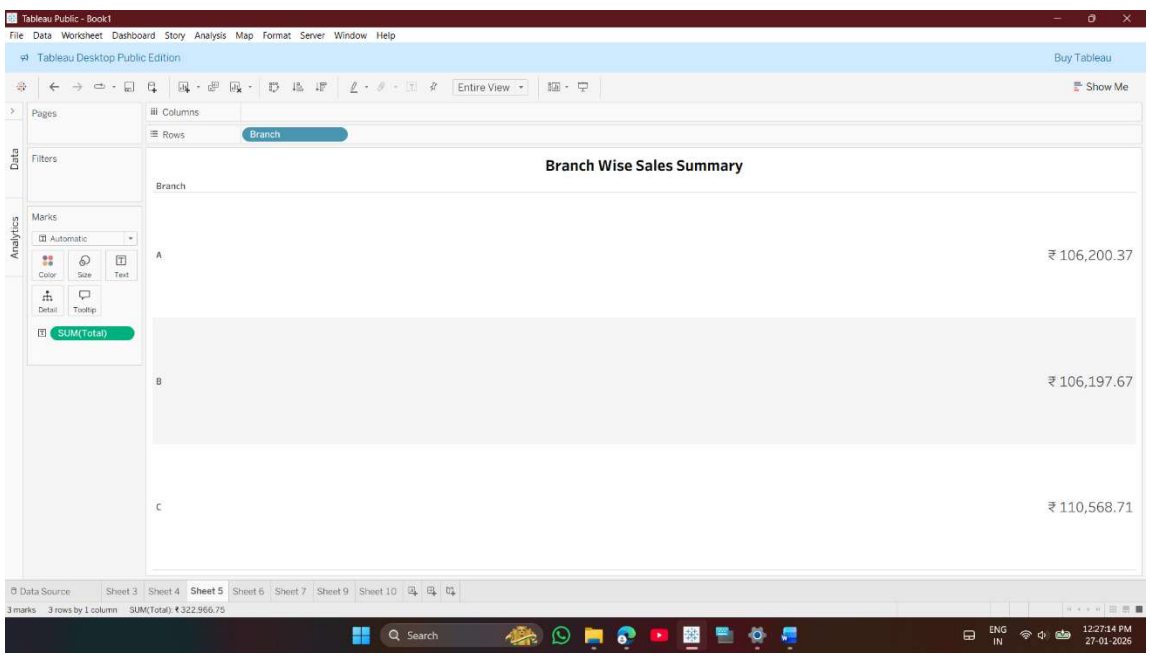
The donut chart illustrates the percentage contribution of each product line to total sales. It helps identify which category generates the highest revenue.

2. Area Chart – Monthly Sales Trend January to March 2019



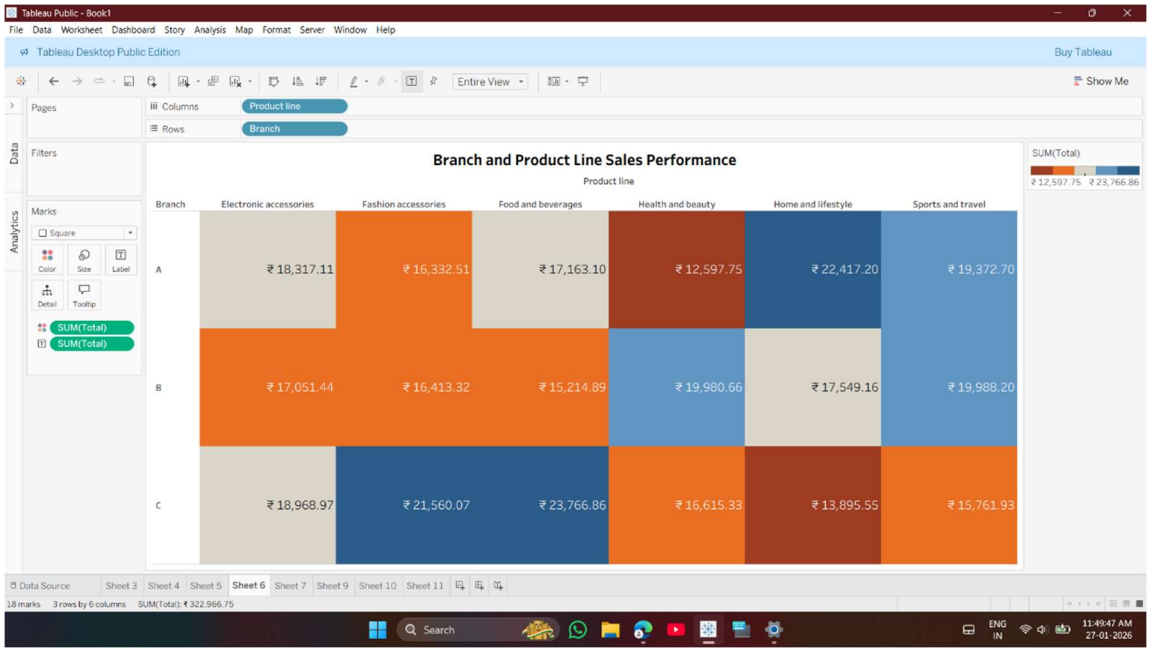
This area chart represents the monthly sales trend across different branches, highlighting variations over time.

3. Text Table – Branch Wise Sales Summary



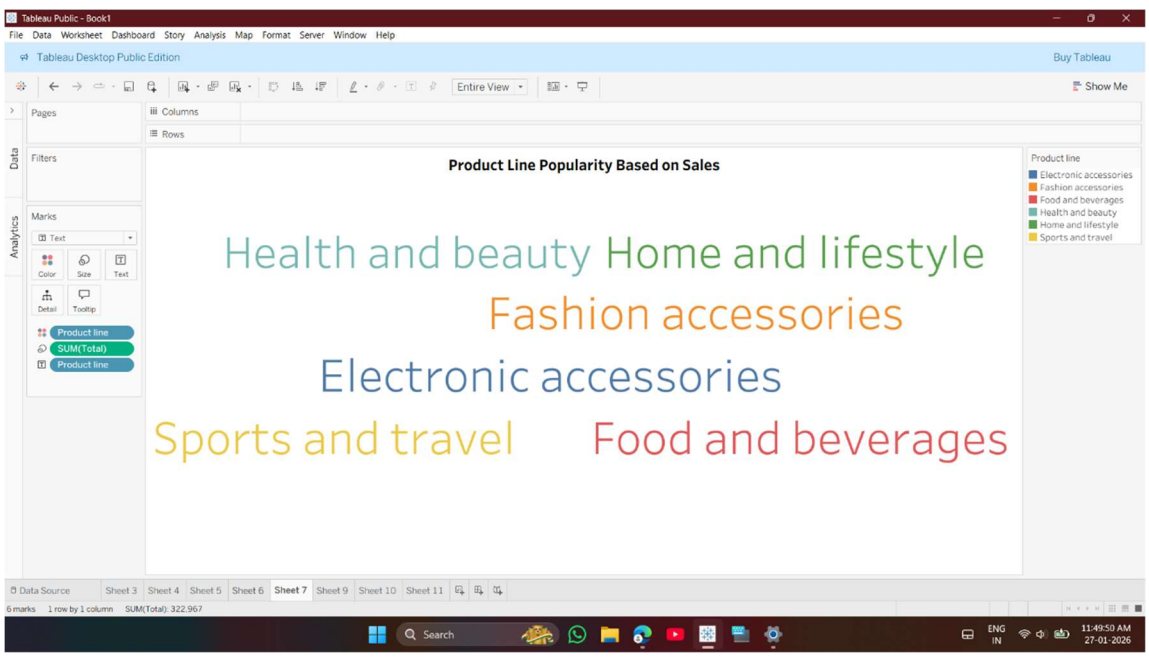
The text table displays total sales generated by each branch, enabling easy comparison of performance.

4. Highlighted Table – Branch and Product Line Sales Performance



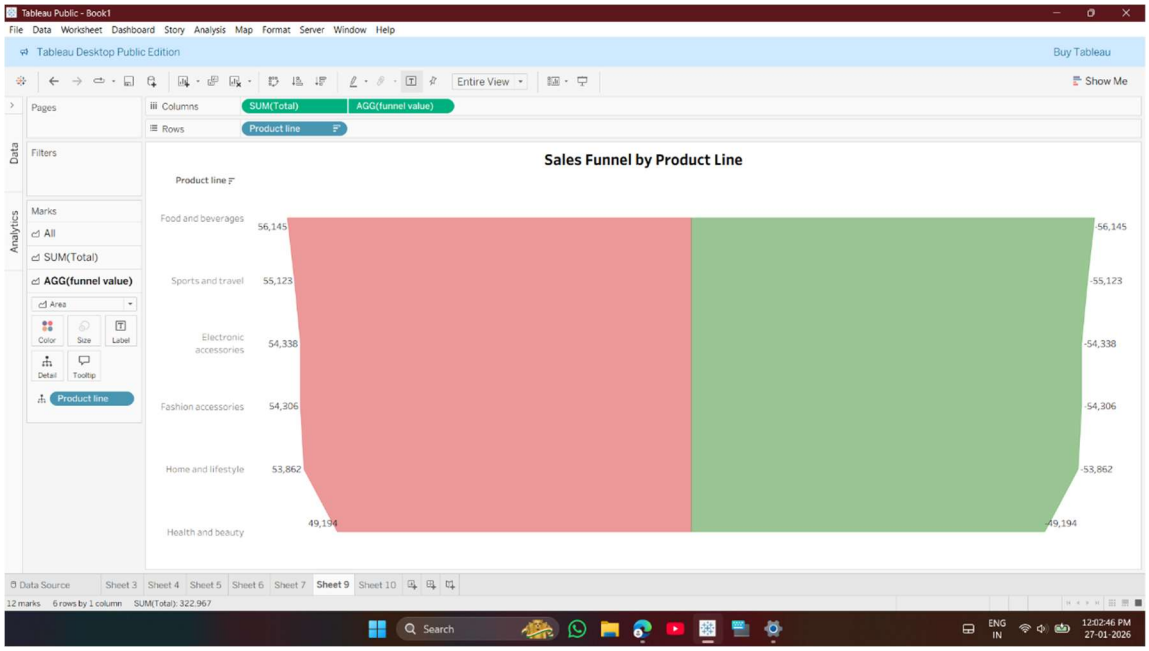
This highlighted table uses color intensity to compare sales across branches and product lines.

5. Word Cloud – Product Line Popularity Based on Sales



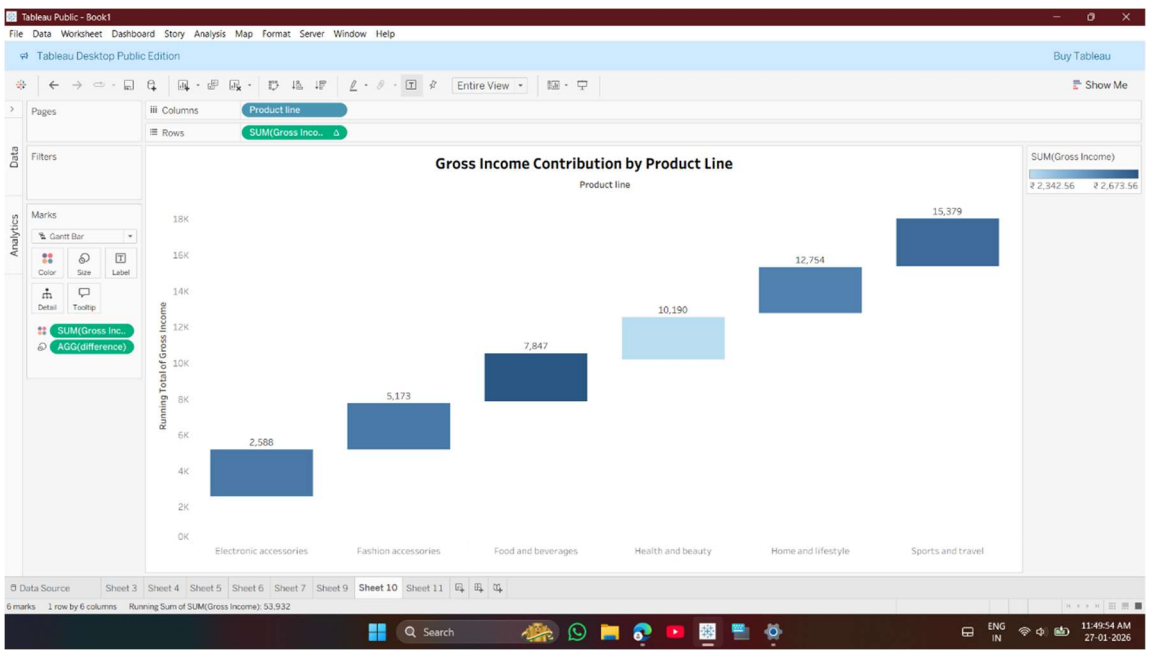
The word cloud visually represents product categories based on their sales contribution. Larger text indicates higher.

6. Funnel Chart – Sales Funnel by Product Line



The funnel chart compares sales distribution among different product categories.

7. Waterfall Chart – Gross Income Contribution by Product Line



The waterfall chart shows how each product line contributes incrementally to overall gross income.
